Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25-49 are rejected under 35 U.S.C. § 103(a) as being unpatentable over any one of Morrison et al. or Okumura et al.

The rejection as set forth under 35 U.S.C. § 103 in Paper No. 4 is deemed proper and is herein repeated.

Applicants' arguments have been fully considered but have been deemed to be not persuasive.

The rejection as set forth under 35 U.S.C. § 103 over Takahashi et al. is herein withdrawn. This is not necessarily in view of the arguments as advanced by the applicant, but rather the fact that the cited art is closer and the application of Takahashi would appear to be redundant.

Applicants argue that both the Okumura and Morrison patents fail to mention the use of a coated titanium dioxide particle having an average size of at most 80 nm. This is not persuasive. Applicants' argument is only partially accurate. The fact of the

Art Unit 1713

matter is that both Okumura and Morrison specifically set forth the use of a coated titanium dioxide. See specifically Okumura at column 12 lines 47+ and Morrison at column 5 line 4+. It is true that these patents fail to mention the average particle size of the coated titanium dioxide to be incorporated. These patents are seen to clearly suggest the incorporation of coated titanium dioxide particles and are seen to be generic to the particle size of the titanium dioxide particles. The instantly claimed particle size is seen to be an obvious species of the disclosed genus. It should be noted that the patents do not teach titanium dioxide particles which are outside of the claimed range but are simply silent to the particle size. As such the claimed particle size is seen to be an obvious species of the disclosed genus.

**THIS ACTION IS MADE FINAL.** Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS

OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
